

iMapinvasives Mobile App for Android or Apple

Report invasive species locations using your tablet or smartphone

- First you will need to create a free iMapInvasives account online at:
www.NYiMapinvasives.org
- Download app from Google Play or iOS App Store (search for “imapinvasives”)

Preferences

“Preferences” are your customized user settings. You will need to fill in your iMapInvasives account information to upload reports to the database.

1. Select State
2. User ID (email) and Password (must match online account!)
3. Select species name and create a custom list (optional).
4. Save your picture to your devices photo library (optional)
5. Select map preference and zoom
6. Select project (optional)
7. Select organization (optional)

Save changes!

Home Page

From the home page users can add a new observation record, view records already collected and access all other functionality via the Menu.

Manually select **box** or choose **Select All** from the menu

Observation Record

Make new reports of invasive species and edit existing records here!

The screenshot shows the 'Observation Record' form in the iMap Invasives mobile app. The form includes a photo selection section at the top with 'Take Photo Using Camera' and 'Select Photo From Library' buttons. Below this is a 'Species' section with a 'Custom List' checkbox and a dropdown menu currently set to 'None Selected'. There are radio buttons for 'Species Detected' and 'Species Not Detected'. A 'Date' field is set to '04/09/2019'. A 'GPS' checkbox is checked, with a note 'Uncheck to manually move location'. A 'Road' dropdown is set to 'Road'. A map of Albany, NY, is displayed with a yellow pushpin. Below the map, the 'Location (Longitude, Latitude)' field shows '-73.7489682, 42.6523979'. There are dropdowns for 'iMap 3 Project' and 'iMap 3 Organization'. A 'Time Searched (in minutes)' field is empty. At the bottom, there is an 'Observation Comments' text area and 'Save' and 'Cancel' buttons.

Take Photo → Take Photo Using Camera / Select Photo From Library

Select Species → Species: Custom List

Select Detected or Not Detected → Species Detected / Species Not Detected

Select Date → Date: 04/09/2019

Uncheck to manually enter location → GPS: Uncheck to manually move location

Zoom In or Out → Map

To manually edit location, uncheck the GPS box, touch and hold the map push pin. Drag it to the location of the invasive. → Map push pin

If 0,0 is displaying in the Location box, please make sure your GPS is enabled on your device. → Location (Longitude, Latitude): -73.7489682, 42.6523979

Select your project and/or organization. If you don't see it listed contact your administrator. → iMap 3 Project (Optional) / iMap 3 Organization (Optional)

Save new observation or updates → Save / Cancel
