

Long Pond- St. Lawrence County

Survey Date: June 13, 2019

Last surveyed: 2014

Lake Description

Long Pond is 50.11-acres and has 1.75-miles of shoreline. It is located in the town of Piercefield, St. Lawrence County and lies in the Raquette River watershed. The team launched two canoes on the Massawepie Conservation Easement tract.

Aquatic Invasive Plant Presence

No invasive plants were detected.

Native Plant Biota

Comprehensive surveys of all native plants found within the pond were not prioritized in 2019. Long Pond's water is turbid, yielding more floating plants than submerged ones. Native species detected in Long Pond were: *Nymphaea odorata* (white water lily), *Nuphar variegata* (yellow pond lily), and *Pontederia* spp. (pickerel weed).

Aquatic Invasive Animal Presence

Sediment sieves were not taken to determine the presence of *Corbicula fluminea* (Asian clams) due to the fact that there was no public, sandy areas along the shoreline available to be surveyed. Three plankton tows were conducted with no invasive zooplankton detected.
